

HAMCRAM ANNOUNCEMENT

Get your Amateur Radio Technician Class FCC License in 1 day!

The New Jersey Emergency Communications Team (<http://NJECT.us>) will be hosting a “HAMCRAM” at 9AM to be held at Manahawkin Bay Ave Community Center on Saturday November 26th 2022.

What is a “HAMCRAM?”

It’s a class where you will review ELEMENT 2 question pool to enable you to pass the Amateur Radio Technician Class License test. From that question pool, you will be given 35 questions on the test. *Morse code is no longer required or part of the test.*

If you are involved with radio communications at any level, we strongly recommend this class, as it will help you understand many facets of radio and open a whole new world of radio communications. This entry level license will allow you to work portions of many bands available to amateur radio operators. The real learning begins AFTER you obtain your license and get on the air!

IMPORTANT CLASS PARTICULARS:

Follow the instructions to Register at <http://hamcram.net/registration.htm>
